Limestone: A living sedimentary rock

L2 Activity 17: Sedimentary Rock. Creating "Graded Beds" MBSPEB pg 46 Crown 1999

This activity investigates how particles of different weights and sizes settle out

L2 Activity 18: Classy Conglomerate. MBSPEB pg 47 Crown 1999

To demonstrate the structure of a conglomerate (a rock made up of small stones held together by a cementing material). You could follow up the activity with a discussion about concrete, which is a manufactured conglomerate

L3-4 How to make the best concrete MBSMW pg 63 Crown 1999

These two substances provide everyday examples of a chemical reaction taking place when water is added. It is also the process representative of limestone cementation.
